

Woof Woof

Hello! My name is Scooby. I live here with my (mistress/ master). I really love my home in (park name). There are so many nice people and dogs to see and to interact with when (Kelly) takes me out for my morning and late afternoon stroll.

The best reason I love living here is that the (owners/mangers) installed JDL DOGIPOT around the park. I know that my (mistress/master Kelly) loves the BAGGIT too. When we leave our RV, she stops by a JDL DOGIPOT and tears off a litter bag so when I go poo poo, he/she can pick it up and dispose of it in the JDL DOGIPOT container.

What a neat idea to keep our grounds clean. And what's more, I heard (Kelly) tell my little friend Mary's mother that dog dirt is responsible for over 90% of the infectious diseases that we dogs contract. It comes from our noses coming into contact with other dogs' feces. And, add to that, children have a higher risk of infection due to their frequent contact with the soil in our park. I don't want Mary or any of her friends getting sick because of me. Also, I don't want you to get sick.

Please tell your (mistress/master) about the JDL DOGIPOT so they can pick up after you so I don't get sick. We dogs are pretty smart and we can do a lot of neat tricks to amuse humans, but the one thing we can't do is clean up after ourselves.

Your canine friend,

Scooby
